z/OS V1R6 Collection

September 2004

eServer zSeries Online Library

z/OS V1R6 Collection

September 2004

Note!

Before using this information and the products it supports, be sure to read the general information under Appendix A.

This softcopy collection index is available in an online version in this collection. It has been formatted for viewing by the IBM Softcopy Reader. You can find it (filename EZ2ZOB43.BOO) in its own bookshelf. It is also available as a BookManager file (filename SCINDEX.BOO), and as a PDF file (filename SCINDEX.PDF), in the root directory. The catalog section of the softcopy collection index is available as an HTML file (filename SCINDEX.HTM) and as a text file (filename SCINDEX.TXT), in the root directory.

| **Fourteenth Edition (September 2004)**

| This edition applies to the *eServer zSeries Online Library: z/OS V1R6 Collection*, September 2004, SK3T-4269-13.

Requests for IBM publications and additional copies of this collection should be made through your IBM representative, the IBM branch office serving your locality, or IBMLink.

A brief user's survey and comments form appears at the back of this softcopy collection index. After you have used this collection, please take a few minutes and fill it in. You can drop it in the U.S. Mail; the postage has already been paid by IBM. If the form has been removed, or if you have problems installing or using the IBM Online Library, or accessing the books, refer to Do You Have Questions, Problems, or Suggestions? following the index for information on how to contact IBM.

IBM may use or distribute whatever information you supply in any way it believes appropriate without incurring any obligation to you.

What's New in This Collection

This section summarizes the product bookshelves, books, or other items that have been added, replaced, or removed since the previous edition, SK3T-4269-12. You may want to refer to Chapter 2, “Catalog of BookManager Files for This Collection” on page 7 for the specific changes that have been made.

Note: Occasionally books move from one bookshelf to another as products are updated or made obsolete. These changes are not listed here. To find a particular book, try one of the following strategies.

- Search one of the online versions of this book:

- EZ2ZOB43.BOO in its own bookshelf
- SCINDEX.BOO in the root directory
- SCINDEX.HTM in the root directory (catalog section only)
- SCINDEX.TXT in the root directory (catalog section only)
- SCINDEX.PDF in the root directory

- Refer to “List of Books in This Collection - Arranged by Order Number” on page 10.
- Search the “All-Disc” bookshelves. See “All-Disc Shelves in This Collection” on page 19 for more information.

New

The following items have been added to this collection for the first time.

Product Libraries Added	Filename	Disc
High Level Assembler for MVS & VM & VSE V1R5.0	ASMSH020	1
SMP/E V3R3.0 for z/OS	GIM2BK30	2
z/OS V1R6.0 BDT	BDTZBK30	1
z/OS V1R6.0 Commands	EZ2CMZ50	2
z/OS V1R6.0 Communications Server	F1A1BK50	1
z/OS V1R6.0 Cryptographic Services	CSFBKZ50	1
z/OS V1R6.0 C/C++	CBCBS150	1
z/OS V1R6.0 DFSMS	DGT2BK40	1
z/OS V1R6.0 Distributed File Service, SMB, and zFS	FCXD0A50	1
z/OS V1R6.0 HCD	CBDZBK50	1
z/OS V1R6.0 HCM	EEQZBK40	1
z/OS V1R6.0 ISPF	ISPZPM30	1
z/OS V1R6.0 Language Environment	CEE2BK50	1
z/OS V1R6.0 Messages and Codes Books	EZ2MZ600	2
z/OS V1R6.0 MVS	IEA2BK50	1
z/OS V1R6.0 OSA/SF	IOA2BK50	2
z/OS V1R6.0 Overview	E0Z2BK50	2
z/OS V1R6.0 Planning and Installation	E0Z2IN50	2
z/OS V1R6.0 RMF	ERBZBK40	2
z/OS V1R6.0 Run-Time Library Extensions	CBCXS100	2
z/OS V1R6.0 Security Server and Integrated Security Services	ICHZBK50	2
z/OS V1R6.0 TSO/E	IKJ4BK50	2
z/OS V1R6.0 UNIX System Services	BPXZSH50	2
z/OS.e V1R6.0 Overview	AP0VBK30	2

Replaced

The following items that appeared in the previous edition have been revised because of technical or service changes or enhancements. The previous levels of these items are no longer current and have been removed from this collection. They have been replaced by the revised items.

Product Libraries Replaced	Old Filename	New Filename	Disc
Booklet for z/OS V1R6 Collection, September 2004	EZ2ZOS42	EZ2ZOS43	1,2
IBM Online Library Reference Bookshelf	AB0RWT2P	AB0RWT2Q	1,2
ICKDSF R17	ICK41912	ICK41913	1
z/OS V1R4.0 IBM HTTP Server	HTTPDG51	HTTPDG60	1
z/OS V1R5.0 JES2	HAS2BK40	HAS2BK41	1
z/OS V1R5.0 JES3	IAT2BK40	IAT2BK41	1

Removed

The following items that appeared in the previous edition have been removed from this collection because they either are no longer current, contain errors, or were not ready at the time this collection went into production.

Product Libraries Removed	Filename
SMP/E V3R1.0 for z/OS and OS/390	GIM2BK12
SMP/E V3R2.0 for z/OS and OS/390	GIM2BK21
z/OS V1R1.0 DCE Application Support	ASUK0A00
z/OS V1R1.0 Encina	ASUA0A00
z/OS V1R3.0 Text Search	IMO1ZA20

Note: For a detailed list of books that have been deleted from bookshelves, see the ASCII file DELETED.TXT in the root directory.

Tools Changes

Streamlined Packaging, Improved Access to Softcopy

- Starting in August 2003, the program for setting autorun preferences has been updated for IBM Softcopy Reader 3.0, which supports extended shelves (XKS files) for PDFs. Extended shelves enable users to access groups of PDFs through the Shelf Organizer in Softcopy Reader.

See “Setting Autorun Preferences for Collection Discs” on page 73 for more information.

- Starting in June 2003, the program for setting autorun preferences has been:
 - Updated to support the latest level of IBM Softcopy Reader (which was repackaged to eliminate the prerequisite for the Java Runtime Environment on the client machine)
 - Recoded to comply with accessibility standards
 - Renamed from SETUP.EXE to AUTORUN.EXE

See “Setting Autorun Preferences for Collection Discs” on page 73 for more information.

- Starting in December 2002, on collections containing both BookManager and PDF files, PDFINDEX.HTM (the index to only the PDF files in the collection) is accessible through the interface to the softcopy collection index. For more information, see “Softcopy PDF Index” on page 82.
- Starting in June 2002, collections containing both BookManager and PDF files include an index to only the PDF files in the collection. The index is available in both HTML and text formats (PDFINDEX.HTM and PDFINDEX.TXT) in the root directory of the discs containing the softcopy files.
- Starting in March 2002, you can set autorun preferences for the programs to run when a collection disc is inserted in your disc drive. For example, you can choose to automatically start Softcopy Reader, the softcopy index for the entire collection, or the softcopy index for a single disc when you insert a disc containing softcopy files. Or, you can choose not to have anything start automatically. See “Setting Autorun Preferences for Collection Discs” on page 73 for more information.

To provide more options for accessing softcopy, multi-disc collections include softcopy indexes for each disc in the collection, as well as a softcopy index for the entire collection.

- Starting in June 2001, the softcopy collection index for a multi-disc collection is automatically displayed when you insert any of the discs other than the tools disc.
- Starting in September 2000, many IBM softcopy collections include a program to simplify installation of softcopy tools and improve access to the softcopy collection index files included on the collections. Here are the highlights of these redesigned collections:
 - Instead of hardcopy collection indexes (booklets), softcopy versions are provided in the root directory of each disc.
 - Instead of a hardcopy version of the *Installing, Managing, and Using the Online Library* book, softcopy versions are provided in the root directory of each disc.
 - For multi-disc collections, all the softcopy tools are on a separate tools disc, instead of on each disc. For single-disc libraries and collections, the tools are on the same disc as the softcopy publications.
 - A program helps you install or update softcopy tools.

This install program runs only on Windows 95 (or later), or on Windows NT 4.0 (or later). Users of other operating systems can still install or update the softcopy tools and view the softcopy versions of the collection index and the *Installing, Managing, and Using the Online Library* book directly.

IBM Softcopy Reader and IBM Library Readers

- The latest level of the IBM Softcopy Reader code is available for downloading from:

<http://www.ibm.com/software/office/bkmgr/softcopyread.html>

Softcopy Reader for Windows and Softcopy Reader for Linux are also available on this collection in the **vilrjava** directory. The level of the code on this collection is what was available when this collection was built.

- For an introduction to Softcopy Reader, see the Softcopy Reader chapter in *Installing, Managing, and Using the Online Library*, GC31-8311. For details, see the softcopy version of the *Softcopy Reader User's Guide*, SC34-3164, which is in the IBM Online Library Reference Bookshelf.
- Starting in September 2004, IBM Softcopy Reader for Linux is shipped in the **vilrjava** directory along with IBM Softcopy Reader for Windows. Softcopy Reader for Linux is currently not supported by the program for installing softcopy tools or by the autorun preferences program, both of which run only under Windows.
- Starting in October 2003, Softcopy Reader for Windows is supported only on Windows™ 2000 and Windows XP.
- Starting in August 2003, a new release (3.0) of the Softcopy Reader for Windows is being shipped on softcopy collections. This release supports extended shelves (XKS files) for PDFs. Extended shelves enable users to access groups of PDFs through the Shelf Organizer in Softcopy Reader.

Softcopy Reader's Bookshelf Organizer has been renamed to "Shelf Organizer," in recognition of the capabilities of the new extended shelf (XKS file) format. The Shelf Organizer can now launch the user's choice of PDF file readers (for example, Adobe® Reader™). The Shelf Organizer can also create and modify extended shelves.

Initially, extended shelves include only PDF publications. Additional publication formats are expected to be added to the extended shelf format in the future.

- Starting in March 2003, a new release (2.4.0) of the Softcopy Reader for Windows is being shipped on softcopy collections. This release has been repackaged using a special tool to link the Java Runtime functions along with the Softcopy Reader application code, building it into a Windows executable instead of a jar file. In addition to eliminating the prerequisite for the Java Runtime Environment on the client machine, this change has significantly improved runtime performance.
- Starting in March 2001, the IBM Library Readers for Windows, OS/2, and DOS are not being shipped on softcopy collections, and are no longer supported. Instead, only the IBM Softcopy Reader is included on the collections.

The IBM Library Readers will continue to be available as-is from the BookManager Web site for those users who choose to continue to use them.

For more information about BookManager products, including the latest news, go to the BookManager Web site:

<http://www.ibm.com/software/office/bkmgr/>

IBM SoftCopy Librarian

- The latest level of the IBM SoftCopy Librarian code is available for downloading from:

<http://publib.boulder.ibm.com/epubs/df/ebrsclwj.exe>

The program is also available on this collection in the **vscl** directory. The level of the code on this collection is the one that was available when this collection was built.

- For an introduction to SoftCopy Librarian, see the SoftCopy Librarian chapter in *Installing, Managing, and Using the Online Library*, GC31-8311. For details, see the softcopy version of the *SoftCopy Librarian User's Guide*, GC23-3414, which is in the IBM Online Library Reference Bookshelf.
- Starting in October 2003, SoftCopy Librarian is supported only on Windows™ 2000 and Windows XP.
- Starting in August 2003, a new release (4.2) of SoftCopy Librarian supports downloading and management of PDFs via extended shelves (XKS files).
This release has been repackaged using a special tool to link the Java Runtime functions along with the SoftCopy Librarian application code, building it into a Windows executable instead of a jar file. In addition to eliminating the prerequisite for the Java Runtime Environment on the client machine, this change has significantly improved runtime performance.
- Starting in June 2002, SoftCopy Librarian (SCL) Version 3 is no longer included on softcopy collections. Only SCL Version 4 is included. Support for SCL Version 3 will be discontinued after September 30, 2002.
If you have been using SCL Version 3, use SCL Version 4 instead.
- Starting in September 2001, the Softcopy Receiver Tool (SCRT) is no longer supported. It is being shipped for the last time on the September and October 2001 softcopy collections. Use the SoftCopy Librarian (SCL) instead.
SCL for OS/2 is no longer supported and is provided on an as-is basis. The product code is available for downloading from:
`ftp://ftp.software.ibm.com/ps/products/ibmreader/tools/ebrsc12.exe`
- Starting in June 2001, the Java version of the SoftCopy Librarian, IBM SoftCopy Librarian V4.0 for Windows 95 and NT, is available.

| LookAt

- The latest level of the LookAt code is available for downloading from:
`http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/lookat.html`
The program is also available on this collection in the **lookat** directory. The level of the code on this collection is the one that was available when this collection was built.
- For an introduction to LookAt, see “LookAt - An IBM Message Lookup Facility (Disc 2)” on page 84. For details, see the LOOKAT ME file in the **lookat** directory.
- Starting in June 2004, LookAt includes a graphical user interface (GUI) for using LookAt on a Windows workstation. This interface is an alternative to using LookAt from a Windows DOS command line.
- Starting in December 2003, LookAt no longer provides enabling code for Palm™ users. For information about support provided for wireless handheld devices, see “LookAt - An IBM Message Lookup Facility (Disc 2)” on page 84.
- Starting in March 2003, LookAt includes the following support:
 - A LookAt Web site specifically for users of wireless personal data assistants (PDAs)
 - InstallShield packaging of enabling code for the workstation and host

- Starting in December 2002, LookAt includes the following support:
 - LookAt enabling code for Windows users
 - Profiles to expand search capability for Windows and TSO users
- Starting in September 2001, LookAt includes the following support:
 - A *point-and-shoot* capability for ISPF and SDSF users

Other Changes

- This collection does not include the hardcopy versions of the collection booklet (this document) and the *Installing, Managing, and Using the Online Library* book.

Softcopy versions are provided in BookManager, PDF, HTML, and ASCII (text) formats in the root directory of each disc in this collection (including the tools disc). The collection booklet is now called the *softcopy collection index*.

To improve access to the softcopy collection index, discs containing the softcopy libraries on this collection now include a program to set autorun preferences for the programs to run when a collection disk is inserted. One of the available options is to open the softcopy collection index.

For details on using the various formats of the softcopy collection index, see Chapter 4, “Locating Books in This Collection” on page 73.

If you need hardcopy versions of these books, you can print one of the softcopy formats, such as the PDF format.

- The graphics in BookManager BOOK files from June 2002 and earlier have been upgraded to improve viewing under BookServer and Softcopy Reader. This upgrade increased the size of the affected files, resulting in the reorganization of some softcopy collections.

For information about the new organization of this collection, see “What’s On Each CD?” on page 8. The changes were too extensive to be listed in “What’s New in This Collection” on page vii.

Other than this increase in size, the change is transparent. The upgrade did not disturb the original build date and time stamp of the affected BOOK files. None of the existing shelves and indexes are affected by the replacement of these BOOK files.

The upgrade primarily affects BOOK files that were built with host versions of the BookManager Build products and that contain graphic figures and illustrations. The original graphics were copied, converted into a Web-ready format, and inserted into the BOOK files for use with BookServer and Softcopy Reader. The original graphics still remain for viewing on host platforms. To benefit from the upgraded graphics, you should upgrade to the latest release of Softcopy Reader, Version 2.3.6 or later.

- In response to customer recommendations, we reorganized this collection starting in December 2002. Discs 1 and 2 contain only BookManager files, and discs 3 and 4 contain only PDF files.
- The books on this collection apply to z/OS.e as well as to z/OS, with the exception of books that document the following elements and features:
 - BDT File-to-File

- BookManager BUILD
 - BookManager READ
 - Communications Server Network Print Facility
 - GDDM
 - GDDM-PGF
 - GDDM-REXX
 - MICR/OCR
- To determine the new name for an element or feature whose name changed, see the index of *z/OS and z/OS.e Planning for Installation*, GA22-7504. This index contains one or more entries for the old name. One of these index entries refers to the place in Table 1 that describes the element or feature using its current name, and relates the old name to the current name.
 - For information about the elements and features in a specific release of z/OS, see *z/OS and z/OS.e Planning for Installation*.
 - For changes in documentation from release to release in z/OS, see the *z/OS Information Roadmap*, SA22-7500.
 - This collection contains a multimedia overview of the z/OS Health Checker. For more information, see “z/OS Best Practices Multimedia Presentation (Disc 4)” on page 89.

Contents of the z/OS V1R6 Collection

Welcome to the IBM Online Library! ☺

This section describes the contents of this collection.

Topics you may want to look at:	Go to page:
If you want an overview of the contents of this collection and how to start using it, see Chapter 1, Getting Started with This Collection	3
If you want to plan for the hard disk space needed to store this information, see Disc Size Summary	9
If you want to know exactly what BookManager-format books are included in this collection, see Chapter 2, Catalog of BookManager Files for This Collection	7
If you want to know exactly what PDF-format books are included in this collection, see Chapter 3, Catalog of PDF Files for This Collection	45
If you want to know how to find a particular book in this collection, see Chapter 4, Locating Books in This Collection	73
If you want to: <ul style="list-style-type: none">• Know the directories containing the books and other products on this collection• Learn how to use the files and tutorials that may be included in this collection see Chapter 5, Other Items in This Collection	83

Chapter 1. Getting Started with This Collection

This is the *eServer zSeries Online Library: z/OS V1R6 Collection*, September 2004, SK3T-4269-13. It contains all the unlicensed books available online for the current release of z/OS base elements and optional features. Using this collection, you can put a large number of IBM books online and access them without handling individual sets of books and libraries on many CD-ROMs and tapes.

This is an IBM Online Library collection. The books in this collection are formatted for display using BookManager BUILD. They can be viewed at your workstation or terminal using any of the following methods.

- The IBM Softcopy Reader, provided at no charge with the library
- AS/400 InfoSeeker, which is provided as a part of the Operating System/400 in Version 3
- Any of the IBM BookManager READ licensed programs for z/VM or or VM
- The IBM BookManager READ component of z/OS or OS/390

This softcopy collection index contains listings of the contents of the collection. It also contains information to help you determine the size of the online books, indexes, and shelves you need to use, as well as hints for customizing and distributing the Online Library to other workstations in your enterprise. *Installing, Managing, and Using the Online Library*, GC31-8311, included with this collection in softcopy, in the root directory and in the IBM Online Library Reference Bookshelf, will help you install and use the collection on your Windows, OS/2, or DOS workstation using this collection, and the IBM Softcopy Reader in it, as a starting point. If you have already installed an IBM Online Library on your workstation or host, you can use the books in this collection with your library as you would use the books in any collection that is part of the IBM Online Library.

For information on using this collection with the IBM reader programs, refer to the IBM Online Library Reference Bookshelf included in this collection.

Note: This softcopy collection index is available in an online version in this collection. It has been formatted for viewing by the IBM reader programs. You can find it (filename EZ2ZOB43.BOO) in its own bookshelf. It is also available as as a BookManager file (filename SCINDEX.BOO) and as a PDF file (filename SCINDEX.PDF), in the root directory. The catalog section of the softcopy collection index is available as an HTML file (filename SCINDEX.HTM) or text file (SCINDEX.TXT), in the root directory.

If You Are New to the IBM Online Library

If you want to install and use an IBM Online Library on your workstation, you should do the following:

- 1** Look at the catalog for a detailed list of the product libraries and other bookshelves in this collection. See Chapter 2, "Catalog of BookManager Files for This Collection" on page 7.
- 2** For a detailed list of PDFs, see Chapter 3, "Catalog of PDF Files for This Collection" on page 45.

- 3** Install the library on your workstation. See *Installing, Managing, and Using the Online Library*, GC31-8311.
- 4** Open the library and list the contents of this collection. See *Installing, Managing, and Using the Online Library*.
- 5** Learn to use the IBM Softcopy Reader. See *Installing, Managing, and Using the Online Library*.

Then, you may want to:

- Customize the library on your workstation. See the BookManager documentation in the Online Library Reference bookshelf.
- Share the library with others. See *Installing, Managing, and Using the Online Library*.

If You Are Already Using an IBM Online Library Collection

If you already have an IBM Online Library collection installed and know how to use it, you may want to do the following:

- 1** Discover what is new or changed in this collection since the last time it was released. See “What’s New in This Collection” on page vii.
- 2** Look at the catalog for a detailed list of the contents of this collection. See Chapter 2, “Catalog of BookManager Files for This Collection” on page 7.
- 3** For a detailed list of PDFs, see Chapter 3, “Catalog of PDF Files for This Collection” on page 45.
- 4** If you have centralized your online library, move the new or changed books you want from this collection to your LAN server or host. See *Installing, Managing, and Using the Online Library*.

Then, you may want to:

- Run the softcopy tool install program to ensure that you have the latest reader on your workstation. See *Installing, Managing, and Using the Online Library*.

Books on the Internet

The contents of several collections are available for viewing on the World Wide Web at <http://www.ibm.com/servers/eserver/zseries/zos>. Books on the Internet might be at a more current level than those on the collections. Click on Library to view, print, and order z/OS books.

PDF Files for Books in This Collection

Printable files in Portable Document Format (PDF) are available for selected books in this collection. These PDF files are provided in the `\pdf` directory on each disc of this collection (other than the tools disc). The PDF files have the same filenames as the corresponding BookManager BOOK files contained on this

collection. For a list of the PDF files, see Chapter 3, “Catalog of PDF Files for This Collection” on page 45.

You can use an Adobe® Reader™ to view and print the PDF files.

- If you do not already have an Adobe Reader installed, you can install one from the CD-ROM using the SCTOOLS.EXE program. If this reader is not appropriate for your system, or if you need information about installing and using an Adobe Reader, see the Adobe Web site at <http://www.adobe.com>
- Softcopy Reader 3.0 or later can be used to access groups of PDFs via extended shelves (XKS files). However, reading the PDF files still requires a separate program, such as Adobe Reader. Also, you cannot use Softcopy Reader to search individual PDFs or extended shelves of PDFs.

PDF documents on this collection contain cross-book links. In order for these links to work, the PDFs must be in the same directory. If the documents are on CD-ROMs or DVDs, the documents must also be on the same disc.

PDFs link to each other by file name, and IBM changes a document's file name whenever the document is updated. Thus, a link from an unchanged PDF might not connect to a new edition of a target document, because the new edition has a new file name. However, a link from an unchanged PDF will still connect to its original target document. Therefore, if you maintain your own PDF repository, IBM recommends that you keep multiple levels of PDFs together in the same directory, to minimize unresolved links. By contrast, BookManager documents link to each other by their base order numbers, which stay the same from release to release, so an unchanged BOOK file can usually link successfully to an updated target BOOK file. For more information about cross-book linking for BookManager documents on this collection, see “Cross-Book Linking for z/OS” on page 93.

Learning More About the IBM Online Library

To learn more about the IBM Online Library organization and availability, visit the IBM softcopy publications home page on the World Wide Web at:
<http://www.ibm.com/servers/eserver/zseries/softcopy/>

Chapter 2. Catalog of BookManager Files for This Collection

This is the catalog of BookManager files for the z/OS V1R6 Collection.

Current Libraries

The product libraries included in this collection contain the latest available updates of the books. Some books have not been updated since the previous release of the product and are still valid for the current release of the product.

This catalog contains:

- **A list of BOOK files** (all BOOKs arranged numerically by order number)

This list contains the following information for the BOOK files:

- The order number of each book
- The title of each book
- The BookManager filename of each book

- **Bookshelf lists**

- An all-disc bookshelf for each CD-ROM
- Bookshelves arranged alphabetically by product, listing the following information:
 - The title of the bookshelf
 - The disc that contains the bookshelf
 - The program number (if the bookshelf contains a product library)
 - The titles of the books
 - The filenames of the BOOK files, the bookshelf, and the bookshelf search index
 - The sizes of the books, the bookshelf, and the bookshelf search index
 - The total size of the bookshelf

Notes:

1. Sizes are given in megabytes, rounded to the nearest hundredth (1MB = 1 000 000 bytes).
2. The "*" in the first column of the tables identifies the books, bookshelves, and search indexes that are new or changed.

For a complete description of technical and service changes, see the "Summary of Amendments" in the indicated books.

3. The product books, bookshelves, and bookshelf search indexes in the IBM Online Library are named according to the following pattern:

bbbbbbss

Where:

bbbbbb is a six-character identifier for a book, bookshelf, or bookshelf search index. This identifier is always the same for the book to which it is assigned.

ss is a two-digit sequence number that identifies the level of the book, bookshelf, or bookshelf search index. This sequence number changes each time a new level of the book, bookshelf, or bookshelf search index is released.

4. All books in this collection appear in U.S. English.

What's On Each CD?

This collection contains four CD-ROMs of softcopy libraries, as well as a separate tools disc. These CD-ROMs are organized as follows:

Tools disc

Softcopy tools
Install program for softcopy tools

Disc 1

BookManager files for:
z/OS V1R6.0 base elements and optional features (B—M)

Disc 2

BookManager files for:
z/OS V1R6.0 base elements and optional features (N—U)
z/OS V1R6.0 commands books
z/OS V1R6.0 messages and codes books
z/OS V1R6.0 planning and installation books
LookAt lookup facility

Disc 3

PDF files for:
z/OS V1R6.0 base elements and optional features (B—J)

Disc 4

PDF files for:
z/OS V1R6.0 base elements and optional features (L—U)
z/OS Now! presentation
z/OS Best Practices presentation

Each disc also includes online versions of the softcopy collection index, a disc index, and the book *Installing, Managing, and Using the Online Library*.

Estimating Hard Disk Space Requirements

If you are copying books to a hard disk, refer to the sizes of books, bookshelves, and bookshelf search indexes listed in the “Disc Size Summary” on page 9 and in the individual bookshelf descriptions in the Chapter 2, “Catalog of BookManager Files for This Collection” on page 7.

Disc Size Summary

Title	MB
Disc 1:	
All-disc 1 bookshelf	0.04
All-disc 1 bookindex	75.35
Individual bookshelves on disc 1	0.04
Individual bookindexes on disc 1	64.96
All books on disc 1	384.65
Individual extended shelves on disc 1	N/A
All PDFs on disc 1	N/A
Size of disc 1	525.05
Disc 2:	
All-disc 2 bookshelf	0.03
All-disc 2 bookindex	62.69
Individual bookshelves on disc 2	0.04
Individual bookindexes on disc 2	78.23
All books on disc 2	367.62
Individual extended shelves on disc 2	N/A
All PDFs on disc 2	N/A
Size of disc 2	508.61
Disc 3:	
All-disc 3 extended shelf	0.11
Individual extended shelves on disc 3	0.13
All PDFs on disc 3	618.35
Size of disc 3	618.59
Disc 4:	
All-disc 4 extended shelf	0.09
Individual extended shelves on disc 4	0.10
All PDFs on disc 4	526.89
Size of disc 4	527.09
Total Size of Collection	2179.34

Chapter 3. Catalog of PDF Files for This Collection

This is the catalog of PDF files for the z/OS V1R6 Collection. The PDF files are available for selected books in this collection.

Current Libraries

The product libraries included in this collection contain the latest available updates of the books. Some books have not been updated since the previous release of the product and are still valid for the current release of the product.

This catalog contains:

- **A list of PDF files** (all PDFs arranged numerically by order number)

This list contains the following information for the PDF files:

- The order number of each book
- The title of each book
- The PDF filename of each book

- **PDF library lists (including extended shelves)**

Each PDF library list contains the following information:

- The title of the PDF library
- The disc that contains the PDF library
- The program number (if the PDF library is for a product)
- The titles of the books
- The filenames of the PDF files and the extended shelf
- The sizes of the PDF files and the extended shelf
- The total size of the PDF library

Notes:

1. Sizes are given in megabytes, rounded to the nearest hundredth (1MB = 1 000 000 bytes).
2. The "*" in the first column of the tables identifies the files that are new or changed.

For a complete description of technical and service changes, see the "Summary of Amendments" in the indicated books.

3. The PDF files generally have the same filenames as the corresponding BookManager BOOK files. Likewise, extended shelves generally have the same filenames as the corresponding BookManager bookshelves. The files are named according to the following pattern:

bbbbbbss

Where:

bbbbbb is a six-character identifier for a book or extended shelf. This identifier is always the same for the book or shelf to which it is assigned.

ss is a two-digit sequence number that identifies the level of the book or extended shelf. This sequence number changes each time a new level of the book or shelf is released.

4. All books in this collection appear in U.S. English, except where indicated otherwise.

Chapter 4. Locating Books in This Collection

Several aids in this collection can help you find books.

- A program to set autorun preferences for collection discs (see “Setting Autorun Preferences for Collection Discs”)
- For each disc containing BookManager files, an all-disc bookshelf for searching the content of all books on that disc (see “All-Disc Bookshelf” on page 74)
- Various formats of the softcopy collection index for searching the titles, order numbers, and file names of softcopy files on the collection (see “Softcopy Collection Index” on page 74)

Note: The softcopy collection index is an online guide to this collection.

- For each disc other than the tools disc, an index for searching the titles, order numbers, and file names of softcopy files on that specific disc (see “Softcopy Disc Index” on page 80)
- For collections containing both BookManager and PDF files, an index of only the PDF files on that collection (see “Softcopy PDF Index” on page 82)

Setting Autorun Preferences for Collection Discs

This collection includes a program to set autorun preferences for the programs to run when a collection disc is inserted. For example, you can choose to automatically start Softcopy Reader, the softcopy index to the entire collection, or the softcopy index for a single disc. Or, you can choose not to have anything start automatically.

The program (AUTORUN.EXE) runs automatically the first time you insert a disc that contains it. A window opens where you can select the autorun preferences for each type of collection disc. These are the preferences you can set.

Note: Extended shelf files can be opened only by Softcopy Reader 3.0 or later.

- **For discs containing only BookManager files:**
 - Open the IBM Softcopy Reader.
 - Open the disc index.
 - Open the collection index.
 - Show the autorun preferences window.
 - Do not start any programs.
- **For discs containing BookManager and PDF files:**
 - Open the IBM Softcopy Reader.
 - Open the disc index.
 - Open the collection index.
 - Show the autorun preferences window.
 - Do not start any programs.
- **For discs containing only PDF files:**
 - Open the disc index.
 - Open the collection index.
 - Show the autorun preferences window.
 - Do not start any programs.

- **For discs containing PDF and extended shelf files:**
 - Open the IBM Softcopy Reader. (This option is available only if Softcopy Reader 3.0 or later is installed.)
 - Open the disc index.
 - Open the collection index.
 - Show the autorun preferences window.
 - Do not start any programs.
- **For discs containing BookManager, extended shelf, and PDF files:**
 - Open the IBM Softcopy Reader.
 - Open the disc index.
 - Open the collection index.
 - Show the autorun preferences window.
 - Do not start any programs.

To set your autorun preferences:

1. For each type of collection disc, select an autorun preference from the selection list.
2. To preview a preference before setting it, select a tool to use now for the current disc.
3. When you are done, click the OK button.

After you save these preferences, the program does not run again unless you have set a preference to run it.

To change your preferences after initially setting them, do one of the following:

- If you are already viewing the collection index (on a disc other than the tools disc), click on the link to AUTORUN.EXE in the tips section.
- Otherwise, go to the root directory of a collection disc (other than the tools disc) and run AUTORUN.EXE.

All-Disc Bookshelf

If you haven't narrowed your search to a product library or book but you know which disc to look on, the *All-Disc* bookshelf on that disc can help you find the book you need. After inserting the disc, go to the bookshelf titled *All-Disc x Bookshelf* and use it to search the contents of all the BookManager BOOK files on the disc. This search can take substantial time because you might be searching the contents of several hundred books.

Softcopy Collection Index

This collection includes four formats of a softcopy collection index to help you locate specific books and bookshelves. The available formats are:

- **HTML:** For viewing with a Web browser. For more information about using the HTML file, see "HTML Format of Softcopy Collection Index" on page 75.
- **BookManager:** For viewing and searching with the IBM Softcopy Reader. For more information about using the BookManager file, see "BookManager BOOK Format of Softcopy Collection Index" on page 77.

Note: When you select the BookManager format, you might see a warning message prompting you to select whether to open the file or save it to disk. Select *Open* it. Also, to view BookManager files without being interrupted by this warning, uncheck the box *Always ask before opening this type of file*, which is also displayed in this warning message.

- **PDF:** For viewing and printing with an Adobe Reader. For more information about using the PDF file, see “PDF Format of Softcopy Collection Index” on page 79.
- **Text (ASCII):** For viewing with a workstation file viewer. For more information about using the TXT file, see “ASCII Text File Format of Softcopy Collection Index” on page 80.

HTML Format of Softcopy Collection Index

The HTML file for the catalog portion of the softcopy collection index is called SCINDEX.HTM. It is in the root directory of each disc in this collection. The best way to use this file is by opening SCFRAME.HTM (the interface to the softcopy collection index) under Internet Explorer 5.0 or later, which enables you to make full use of the support provided in SCFRAME.HTM. While viewing this HTML file, you can scroll through it or search for an order number, keyword, or phrase in the title of a specific book or bookshelf.

You can set up your browser to link to the books on the CD after you locate the book you want. If you do not set up your browser for links to BookManager files, you can still view and search the HTML file to locate the disc that the book is on. For instructions on setting up your browser, see “Setting Up Your Browser to Link to the Books on the CD” on page 77. For tips on making Internet Explorer your default browser, see “Making Internet Explorer Your Default Browser” on page 76.

Note: If you transfer the softcopy files on a collection to a softcopy repository, you might want to provide the same access to these files as you have when the softcopy collection index (SCINDEX.HTM) is loaded within the SCFRAME.HTM frameset on a collection disc. For more information, see *Installing, Managing, and Using the Online Library*, GC31-8311.

To use SCINDEX.HTM, do the following:

- 1 Insert any numbered disc from this collection into your CD-ROM drive.
- 2 Do **one of** the following:
 - If you have set your autorun preferences to open the collection index for the type of disc you inserted, your browser automatically displays SCINDEX.HTM.
 - If you are viewing the PDF index, click on the PDF index tab to switch to the collection index.
 - If you are viewing the disc index, click on the Disc index tab to switch to the collection index.
 - If you are viewing some other document in SCFRAME.HTM, move your cursor over the Collection index, Disc index, or PDF index tab. Use the radio buttons to select the collection index.

- Otherwise, go to the root directory and open SCFRAME.HTM, which displays SCINDEX.HTM as part of SCFRAME.HTM.

3 When viewing SCINDEX.HTM, you can do any of the following:

- Scroll through SCINDEX.HTM to find what you want.
- Use the Find function to find the order number, keyword, or phrase in a book or bookshelf title.

Notes:

- a. You might get more than one hit for the same book, because a book might be listed in more than one place.
- b. If you are viewing the softcopy collection index through SCFRAME.HTM under Internet Explorer, you can use a Find option that displays all the hits in a separate window. To use this option, click on "Options" next to the "Find" button. The options will be displayed above the "Find" button. Click on the "Show all hits" box.

4 When you have determined which disc the book is on, replace the disc you are looking at with the correct disc, if necessary.

5 Do **one of** the following:

If you have set up your browser for links to BookManager and PDF files:

Click on the link in SCINDEX.HTM to open the book.

Notes:

- a. For instructions on setting up your browser, see "Setting Up Your Browser to Link to the Books on the CD" on page 77.
- b. When you click on a link to a book, you might see a warning message prompting you to select whether to open the file or save it to disk. Select Open it. To view files without being interrupted by this warning, uncheck the box Always ask before opening this type of file.
- c. If you are viewing the softcopy collection index through SCFRAME.HTM under Internet Explorer, and you click on a link for a book that is not on the disc that is currently inserted, you will see a message that tells you which disc to insert in order to view the selected book.

If you have not set up your browser links to BookManager and PDF files: Proceed as usual to locate and open the book with IBM Softcopy Reader (for BookManager files) or Adobe® Reader™ (for PDF files).

Making Internet Explorer Your Default Browser

In order to use all the support provided by SCFRAME.HTM for finding the book you are looking for, you should make sure that you open SCFRAME.HTM under Internet Explorer. One way to ensure that you do this is to make Internet Explorer your default browser. If you have Internet Explorer (IE) installed but your system does not automatically open IE as your browser, do the following:

1. From your desktop, go to Start -> Settings -> Control Panel.
2. Under Internet Options, choose the Programs tab.
3. Click on the box "Internet Explorer should check to see if it is the default."

4. Manually launch IE. It will ask if you want to make IE your default browser. Answer "Yes."

Setting Up Your Browser to Link to the Books on the CD

You can use the HTML collection index without setting up your browser to link to the BookManager files. However, although you will be able to see a list of the contents of the collection, you will not be able to open the books from the softcopy index.

To link to and open the BookManager files from the HTML file, your browser preferences must specify which program it should use to open files with the various BookManager file extensions. When you install IBM Softcopy Reader 2.3.8 or later, it automatically provides this MIME-type information to simplify access to BookManager files through a browser interface.

If you want your browser to link to BookManager files, first install the IBM Softcopy Reader. You can use the install program provided with this collection to install the reader.

Note: Regardless of how you install the IBM Softcopy Reader, make sure to shut down and restart your browser afterwards. This ensures that the browser will invoke the IBM Softcopy Reader to open BookManager files.

BookManager BOOK Format of Softcopy Collection Index

The BookManager format of the complete softcopy collection index is provided in two locations, under two different filenames. (Other than the filenames, the two files are identical.)

- The copy accessible from the root directory or through SCFRAME.HTM is called SCINDEX.BOO. It is in the root directory of each disc in this collection.
- The other copy is called EZ2ZOB43.BOO. It is located in its own bookshelf on each disc in the collection, other than the tools disc. For example, in the OS/390 Collection the bookshelf is called "Booklet for OS/390 Collection."

The BookManager format provides the best search function of all the formats. It can also be used to print selected sections of the book, but the PDF format is recommended for printing large sections or an entire book.

You can view either copy of the BOOK file with IBM Softcopy Reader (on your workstation), or with an IBM BookManager READ program (on the host). While viewing the BOOK file, you can scroll through it or search it for an order number, keyword, or phrase in the title of a specific book or bookshelf. If you locate the book you want, you can then see which disc it is on.

To use SCINDEX.BOO, do the following:

1 Insert any disc from this collection into your CD-ROM drive.

2 Do **one of** the following:

- If you are viewing the HTML format of the collection index, go to "Other Formats" and select "BookManager."

- If you are viewing the PDF index, click on the PDF index tab to switch to the collection index. Then go to “Other Formats” and select “BookManager.”
- If you are viewing the disc index, click on the Disc index tab to switch to the collection index. Then go to “Other Formats” and select “BookManager.”
- If you are viewing some other document in SCFRAME.HTM, move your cursor over the Collection index, Disc index, or PDF index tab. Use the radio buttons to select the collection index. Then go to “Other Formats” and select “BookManager.”
- Otherwise, go to the root directory and open SCINDEX.BOO.

3 You can do any of the following:

- Scroll through SCINDEX.BOO to find what you want.
- Go directly to the section of SCINDEX.BOO titled “Catalog for *name* Collection” and scroll through the lists.
- Search for an order number, keyword, or phrase in a book or bookshelf title.

Note: You might get more than one hit for the same book, because a book might be listed in more than one place.

4 When you have determined the disc the book is on, replace the disc you are looking at with the correct disc, if necessary.

5 Proceed as usual to locate and open the book.

To use EZ2ZOB43.BOO, do the following:

1 Insert any numbered disc from this collection into your CD-ROM drive.

2 Display the list of bookshelves. Do **one of** the following:

- If you have set your autorun preferences to open the IBM Softcopy Reader for the type of disc you inserted, your browser automatically displays the list of bookshelves.
- In a command prompt window, change to the drive letter of your CD-ROM drive and enter the command to start your reader or select its icon and list the bookshelves on the disc.

The list of bookshelves will appear.

- Locate the BookManager icon.
- Click on the start menu and select the BookManager reader.

The list of bookshelves will appear.

3 In the list of bookshelves, look for the bookshelf titled “Booklet for *name* Collection.”

4 Open the bookshelf.

5 Open the booklet.

- 6 You can do any of the following:
 - Scroll through the booklet to find what you want.
 - Go directly to the section of the booklet titled “Catalog for *name* Collection” and scroll through the lists.
 - Search for an order number, keyword, or phrase in a book or bookshelf title.

Note: You might get more than one hit for the same book, because a book might be listed in more than one place.
- 7 When you have determined the disc the book is on, replace the disc you are looking at with the correct disc, if necessary.
- 8 Refresh the bookshelf view in Bookshelf Organizer and proceed as usual to locate and open the book.

Note: If you are using Softcopy Reader 2.3.5 or later, the bookshelf view is automatically refreshed by default.

PDF Format of Softcopy Collection Index

The PDF file for the complete softcopy collection index is called SCINDEX.PDF. It is in the root directory of each disc in this collection. From the PDF file you can print high-quality output that looks very similar to printed books received from IBM.

You can view the PDF file with an Adobe Reader. While viewing the PDF file, you can scroll through it or find an order number, keyword, or phrase in the title of a specific book or bookshelf. If you locate the book you want, you can then see which disc it is on.

To use SCINDEX.PDF, do the following:

- 1 Insert any disc from this collection into your CD-ROM drive.
- 2 Display SCINDEX.PDF. Do **one of** the following:
 - If you are viewing the HTML format of the collection index, go to “Other Formats” and select “PDF.”
 - If you are viewing the PDF index, click on the PDF index tab to switch to the collection index. Then go to “Other Formats” and select “PDF.”
 - If you are viewing the disc index, click on the Disc index tab to switch to the collection index. Then go to “Other Formats” and select “PDF.”
 - If you are viewing some other document in SCFRAME.HTM, move your cursor over the Collection index, Disc index, or PDF index tab. Use the radio buttons to select the collection index. Then go to “Other Formats” and select “PDF.”
 - Locate the icon for Adobe Reader on your desktop or program list, then open SCINDEX.PDF from the root directory of the disc in the CD-ROM drive.
 - Go to the root directory and open SCINDEX.PDF.
- 3 You can do any of the following:

- Scroll through SCINDEX.PDF to find what you want.
- Use the Search function of the Adobe Reader to find the order number, keyword, or phrase in a book or bookshelf title.

Note: You might get more than one hit for the same book, because a book might be listed in more than one place.

- 4 When you have determined which disc the book is on, replace the disc you are looking at with the correct disc, if necessary.
- 5 Refresh the view and proceed as usual to locate and open the book.

ASCII Text File Format of Softcopy Collection Index

The ASCII file for the catalog portion of the softcopy collection index is called SCINDEX.TXT. It is in the root directory of each disc in this collection. You can view it with your usual text editor or word processor, such as Notepad. While viewing SCINDEX.TXT, you can scroll through it or find an order number, keyword, or phrase in the title of a specific book or bookshelf. If you locate the book you want, you can then see which disc it is on.

To use SCINDEX.TXT, do the following:

- 1 Insert any disc from this collection into your CD-ROM drive.
- 2 Display SCINDEX.TXT. Do **one of** the following:
 - In a command prompt window, change to the drive letter of your CD-ROM drive and enter the command to start your usual text editor or word processor.
 - Locate the icon for your usual text editor or word processor.
 - Click on the start menu and select your text editor.
- 3 You can do any of the following:
 - Scroll through SCINDEX.TXT to find what you want.
 - Find the order number, keyword, or phrase in a book or bookshelf title.

Note: You might get more than one hit for the same book, because a book might be listed in more than one place.
- 4 When you have determined which disc the book is on, replace the disc you are looking at with the correct disc, if necessary.
- 5 Refresh the view and proceed as usual to locate and open the book.

Softcopy Disc Index

Each numbered disc of this collection includes an HTML file listing the softcopy files on that specific disc. This file is called DISC.HTM and is in the root directory of each disc of this collection except the tools disc. You can view this file with a Web browser. While viewing this HTML file, you can scroll through it or search for an order number, keyword, or phrase in the title of a specific book or bookshelf.

You can set up your browser to link to the books on the CD after you locate the book you want. If you do not set up your browser for links to BookManager files, you can still view and search the HTML file to locate the disc that the book is on.

To use DISC.HTM, do the following:

1 Insert any numbered disc from this collection into your CD-ROM drive.

2 Do **one of** the following:

- If you have set your autorun preferences to open the disc index for the type of disc you inserted, your browser automatically displays DISC.HTM.
- If you are viewing the collection index, click on the Collection index tab to switch to the disc index.
- If you are viewing the PDF index, click on the PDF index tab to switch to the disc index.
- If you are viewing some other document in SCFRAME.HTM, move your cursor over the Collection index, Disc index, or PDF index tab. Use the radio buttons to select the disc index.
- Otherwise, go to the root directory and open SCFRAME.HTM. Place your cursor over the Collection index tab, then click on the radio button for the disc index.

3 From DISC.HTM, you can do any of the following:

- Scroll through DISC.HTM to find what you want.
- Use the Find function to find the order number, keyword, or phrase in a book or bookshelf title.

Note: You might get more than one hit for the same book, because a book might be listed in more than one place.

4 Do **one of** the following:

If you have set up your browser for links to BookManager files: Click on the link in DISC.HTM to open the book.

Notes:

- a. For instructions on setting up your browser, see “Setting Up Your Browser to Link to the Books on the CD” on page 77.
- b. In DISC.HTM, when you click on a link to a book, you might see a warning message prompting you to select whether to open the file or save it to disk. Select *Open it*. To view files without being interrupted by this warning, uncheck the box *Always ask before opening this type of file*.

If you have not set up your browser links to BookManager files: Proceed as usual to locate and open the book with IBM Softcopy Reader.

Softcopy PDF Index

Each numbered disc of this collection includes an HTML file listing only the PDF files contained on this collection. This file is called PDFINDEX.HTM and is in the root directory of each disc of this collection except the tools disc. You can view this file with a Web browser. While viewing this HTML file, you can scroll through it or search for an order number, keyword, or phrase in the title of a specific book.

To use PDFINDEX.HTM, do the following:

1 Insert any numbered disc from this collection into your CD-ROM drive.

2 Do **one of** the following:

- If you are viewing the collection index or disc index, click on the Collection index or Disc index tab to switch to the PDF index.
- If you are viewing some other document in SCFRAME.HTM, move your cursor over the Collection index, Disc index, or PDF index tab. Use the radio buttons to select the PDF index.
- Otherwise, go to the root directory and open SCFRAME.HTM. Place your cursor over the Collection index tab, then click on the radio button for the PDF index.

3 From PDFINDEX.HTM, you can do any of the following:

- Scroll through PDFINDEX.HTM to find what you want.
- Use the Find function to find the order number, keyword, or phrase in a book title.

Note: You might get more than one hit for the same book, because a book might be listed in more than one place.

4 Do **one of** the following:

If you have set up your browser to open PDF files: Click on the link in PDFINDEX.HTM to open the book.

Note: In PDFINDEX.HTM, when you click on a link to a book, you might see a warning message prompting you to select whether to open the file or save it to disk. Select Open it. To view files without being interrupted by this warning, uncheck the box Always ask before opening this type of file.

If you have not set up your browser to open PDF files: Proceed as usual to locate and open the book with Adobe Reader.

Chapter 5. Other Items in This Collection

In addition to books, bookshelves, and bookshelf search indexes, this collection also contains:

- **SCINDEX.xxx:** The softcopy collection index, in various formats, which lists and links to all the softcopy books on this collection. For more information, see “Softcopy Collection Index” on page 74.
- **DISC.HTM:** A disc-specific, single-disc softcopy index, which lists and links to all the softcopy books on the disc that contains this file. For more information, see “Softcopy Disc Index” on page 80.
- **PDFINDEX.xxx:** The PDF collection index, in various formats, which lists and links to all the books in PDF format on this collection. For more information, see “Softcopy PDF Index” on page 82.
- **INSTALL.xxx:** The *Installing, Managing, and Using the Online Library* book, in various formats which describes the softcopy tools on this collection.
- **SCTOOLS.EXE:** A program to install or update softcopy tools.
SCREADME.TXT: Instructions for SCTOOLS.EXE.
- **AUTORUN.EXE:** A program to set or change preferences for accessing softcopy books when a disc is inserted. For more information, see “Setting Autorun Preferences for Collection Discs” on page 73.
- **IBM Softcopy Reader:** A program to help you view BookManager books, bookshelves, and extended shelves; search books and bookshelves; and organize books, bookshelves, and extended shelves.
- **IBM SoftCopy Librarian:** A program to help you manage BookManager files (including extended shelves) in a repository and download BookManager files (including extended shelves) from the Internet.
- **Adobe® Reader™:** A program to help you view and print PDF files.
- **LookAt message lookup facility:** A program to help you look up message explanations. For more information, see “LookAt - An IBM Message Lookup Facility (Disc 2)” on page 84.
- **z/OS Now! presentation:** A multimedia overview of z/OS. For more information, see “z/OS Now! Multimedia Presentation (Disc 4)” on page 88.
- **z/OS Best Practices presentation:** A multimedia overview of the z/OS Health Checker tool. For more information, see “z/OS Best Practices Multimedia Presentation (Disc 4)” on page 89.

LookAt - An IBM Message Lookup Facility (Disc 2)

What Is LookAt?

With LookAt, you can look up message explanations quickly and easily. LookAt is an online facility that lets you look up explanations for most of the IBM messages you encounter, as well as for some system abends and codes. Using LookAt to find information is faster than a conventional search because in most cases LookAt goes directly to the message explanation.

You can use LookAt from the following locations to find IBM message explanations for z/OS elements and features, z/VM, and VSE:

- Over the Internet. You can access IBM message explanations directly from the LookAt Web site using the current interface at:

<http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/>

Or, you can access the new LookAt GUI Web site at:

<http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/lookatg.html>

Note: The new LookAt GUI requires the ShockWave plugin, which you can download from the new interface.

- On your z/OS TSO/E host system. You can install LookAt code on your z/OS or z/OS.e systems to access IBM message explanations, using LookAt from a TSO/E command line (for example, a TSO/E prompt, ISPF, or z/OS UNIX System Services running OMVS).
- On your Windows workstation. You can install LookAt code to access IBM message explanations on the *z/OS Collection*, (SK3T-4269), using LookAt from a Windows DOS command line or a graphical user interface (GUI). When you install LookAt on your workstation, a LookAt icon for the GUI is optionally placed on your desktop and a LookAt profile is created that points to your current CD drive.
- On your wireless handheld device. You can use the LookAt Mobile Edition with a handheld device that has wireless access and an Internet browser (for example, Internet Explorer™ for Pocket PCs, Blazer™ or Eudora™ for Palm OS™, or Opera™ for Linux handheld devices). Link to the LookAt Mobile Edition from the LookAt Web site.

You can obtain code to install LookAt on your host system or Windows workstation from a disk on your *z/OS Collection*, (SK3T-4269), or from the LookAt Web site (click **Download**, and select the platform, release, collection, and location that suit your needs). More information is available in the LOOKAT.ME files available during the download process.

Using LookAt on the Internet

If you have Web access, please visit our LookAt Web page at:

<http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/>

Follow the instructions on the Web page to use LookAt, get help, take the LookAt Survey, and provide feedback to LookAt development.

LookAt on Your Workstation

You can use LookAt on your workstation to look up messages on this collection. Using the LOOKAT command and a disc from this collection, you can retrieve the explanation and any other information associated with any message that you might receive. LookAt uses the BookManager Softcopy Reader, which is also available on this collection.

Using LookAt on Your Windows Workstation: Suppose you need information about a message you receive during a host session, you can access LookAt by either of the following methods:

- Using the LookAt GUI from your desktop:
You only need to enter the host message ID, select your profile, and click GO.
- Using the LookAt command from a DOS prompt window:
You must type the LOOKAT command (rex lookat.exe) followed by the host message ID and the name of your LookAt profile.

You will then see all the available information related to that message.

LookAt uses a specified profile to locate your CD-ROM drive and the path to the LookAt directory and index files on the disc in the CD-ROM drive. LookAt uses InstallShield to copy the necessary files to your workstation and edits the profile to reflect the location of your CD or DVD drive and the location of the LookAt index and directory. The paths to the LookAt files and to the books on the disc are the same in all collections.

If you deal with multiple softcopy collections, multiple systems, or multiple releases of a system, you can create multiple profiles for them. However, using a single profile, modified for your production system, should work for most of your users.

Preparing to Set Up LookAt on Your Workstation: All the items you need to install and set up LookAt are contained in the LOOKAT directory on disc 2 of this collection. You can find the instructions for installing LookAt in the “readme” file named LOOKAT.ME.

You can also obtain this “readme” file from the LookAt FTP site, directly or through the LookAt Web site.

- If you have the ability to FTP, you can reach the LookAt FTP site directly at:
`ftp://ftp.software.ibm.com/ps/products/ibmreader/tools/lookat`
- If you have a Web connection and the ability to FTP, you can reach the LookAt FTP site using the Download button on the LookAt Web site at:
`http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/`

Note: The books and files are always more current on the LookAt FTP site than those on this collection.

- In this collection, check the disc labels to locate the disc that contains the LOOKAT code. The LookAt files are in the \LOOKAT\WINDOWS subdirectory of the LOOKAT directory (in collections for December 2002 or later).

LookAt on Your z/OS Host

LookAt is a REXX EXEC that runs under TSO on your OS/390 or z/OS host. Using the LOOKAT command and your repository of IBM books on your host system, you can retrieve the explanation and any other information associated with many of the messages that you might receive. ISPF and SDSF users can take advantage of a “point-and-shoot” capability. LookAt uses InstallShield to copy the necessary files to your workstation and help you edit your LookAt profile so you can upload them to your host. After you have uploaded the files, you must ensure the profile and directory point to the location of the LookAt files and the books and bookshelves on your host. You can also edit your profile after you have uploaded the files.

After LookAt is installed on your host, the person installing the code can enable point and shoot. If it is enabled on your system, you can assign the LOOKAT command to a PF key of your choice. Then, as messages appear, you can position your cursor under the message ID and press your PF key to tell LookAt to retrieve that message explanation.

LookAt uses BookManager READ/MVS to locate and display message information from messages and codes books.

Using LookAt on Your z/OS Host: Suppose you need information about a message you receive during your host session. You can use the LOOKAT command followed by the message ID and see all the available information related to that message.

LookAt uses a profile to locate where on your host you put the LookAt directory and index files. After you have installed the LookAt code on the host, you can edit the profile and add the high-level qualifiers to the data set name for these files. If you deal with a sysplex, multiple LPARs, multiple systems, multiple releases, and so on, you can create multiple profiles for them. However, using a single profile, modified for your production system, should work for most of your users.

You can enter the LOOKAT command in a variety of places:

- On TSO, at the “READY” prompt
- In ISPF or SDSF, “point-and-shoot” using a preassigned PF key
- From the ISPF Option 6 Command panel
- From any ISPF command line (prefixed by the letters **TSO** and a space)
- From a UNIX Systems Services shell (such as OMVS, prefixed by the letters TSO and a blank space)

If you are running an ISPF application, you can also split the screen (**F2**) and have your message explanations appear on a portion of the screen that you are using to do your work.

Preparing to Set Up LookAt on Your Host: All the items you need to install and set up LookAt are contained in the LOOKAT directory on disc 2 of this collection. You can find the instructions for installing LookAt in the “readme” file named LOOKAT.ME.

You can also obtain this file from the LookAt FTP site, directly or through the LookAt Web site.

- If you have the ability to FTP, you can reach the LookAt FTP site directly at:

| <ftp://ftp.software.ibm.com/ps/products/ibmreader/tools/lookat>

- | • If you have a Web connection and the ability to FTP, you can reach the LookAt FTP site using the Download button on LookAt Web site at:

| <http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/>

| **Note:** The books and files are always more current on the LookAt FTP site than those on this collection.

- | • In this collection, check the disc labels to locate the disc that contains the LOOKAT code. The LookAt files are in the \LOOKAT\TS0 or \LOOKAT\TS0XMIT subdirectory of the LOOKAT directory (in collections for September 1999 or later).

| **Using LookAt on your wireless handheld Personal Data Assistant (PDA)**

| LookAt for Wireless is a mobile Web site designed for users of wireless handheld devices. If you have a wireless handheld device, the mobile LookAt Web page gives you easy access to message information from anywhere. The Web page has only the information needed to submit your message request. Using the browser on your device, it calls the mobile version of BookServer so once you have the explanation on the screen, you can navigate just as you would at the LookAt site. To try it, simply cut and paste this URL into your PDA's browser:

| <http://www.ibm.com/servers/s390/os390/bkserv/lookat/lookatw.html>

z/OS Now! Multimedia Presentation (Disc 4)

What Is "z/OS Now!"?

z/OS Now! is a multimedia presentation that shows how z/OS meets today's computing demands, and explains why now is the time to migrate from OS/390 to z/OS V1R4 to prepare for the future. The first part of the presentation is about a minute long, and animates colorful images with optional narration that states what customers want their mainframe systems to do. The second part of the presentation is a self-paced slide show with more details about z/OS features and migration.

Minimum System Requirements

- Microsoft Windows 95 or later
- Pentium-class workstation
- 16MB RAM (32MB RAM recommended)
- SVGA or higher (640 x 480, 256 colors minimum)
- 4X CD-ROM drive (if you want to run the presentation from the CD-ROM)
- 2MB hard disk space (if you want to run the presentation from your hard disk)
- Mouse
- Sound card and speakers (if you want to hear the narration)

Running the Presentation

z/OS Now! is a 1.8M Windows executable file (.EXE) that you can run directly from the CD-ROM. You can also copy the file to your hard disk. To run the presentation, double-click on the icon next to the file name (zos_now.exe).

z/OS Best Practices Multimedia Presentation (Disc 4)

What Is "z/OS Best Practices"?

z/OS Best Practices is a multimedia presentation that shows how the z/OS Health Checker tool, available on www.ibm.com, helps you configure your z/OS system to prevent system outages and run more efficiently. The first part of the presentation is about a minute long, and animates pictures of system programmers and their concerns about their systems, and how Health Checker helped them become more aware of z/OS best practices. The rest of the presentation contains self-paced slide shows describing Health Checker installation, what Health Checker checks, sample Health Checker output, and z/OS availability features.

Minimum System Requirements

- Microsoft Windows 95 or later
- Pentium-class workstation
- 16MB RAM (32MB RAM recommended)
- SVGA or higher (640 x 480, 256 colors minimum)
- 4X CD-ROM drive (if you want to run the presentation from the CD-ROM)
- 2MB hard disk space (if you want to run the presentation from your hard disk)
- Mouse
- Sound card and speakers (if you want to hear the narration)

Running the Presentation

z/OS Best Practices is a 1.2M Windows executable file (.EXE) that you can run directly from the CD-ROM. You can also copy the file to your hard disk. To run the presentation, double-click on the icon next to the file name (bestprac.exe).

Appendix A. Notices

This information was developed for products and services offered in the U.S.A.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe on any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing

Terms and Conditions for Items in This Collection

This collection contains unlicensed books and licensed programs. Before using or copying the books and programs on this collection, you must first read and agree to the terms and conditions specified for them below. If you do not agree, return this collection to IBM. By using or copying the books and programs on this collection, you agree to the terms and conditions and the license agreement.

Note: To display or print the ASCII files, insert any disc in the collection in your CD-ROM or DVD drive and use the TYPE or PRINT command with the drive letter of your drive. The following examples assume that the drive on your workstation is D. For example, to display or print the BOOKENG.AGR file, use the following commands:

```
type d:\bookeng.agr | more  
print d:\bookeng.agr
```

If your drive is not D, replace the d in the examples with the drive letter for your system.

Using and Copying Unlicensed Books

Unlicensed books on this collection have order numbers that begin with the letters "G" or "S." The terms and conditions for using and copying the unlicensed books are stated in a file called BOOKENG.AGR on this disc. The file is in ASCII format and can be displayed or printed from your personal computer.

Using and Distributing the IBM Softcopy Reader Program

The terms and conditions for using and distributing the IBM Softcopy Reader program are stated in a file called PLALRENG.AGR on this collection. The file is in ASCII format and can be displayed or printed from your personal computer.

Where to Find Licensed Books for z/OS

Licensed books for z/OS base elements and optional features can be found in the *z/OS Licensed Product Library*, LK3T-4307.

Cross-Book Linking for z/OS

Books on this collection contain cross-book links to related z/OS books. While reading a z/OS book, you can place the cursor under any part of the title of a referenced z/OS book and press Enter to open the book. After searching and reading the related material, you can close the referenced book to return to the original book.

Cross-book linking is available with many of the BookManager READ products. Check the BookManager READ documentation included in this collection for more information.

If you are using BookManager READ/MVS, which is included in z/OS, all books to which you want to link must be on the same bookshelf. The books must also:

- Be in sequential data sets with a fixed record length of 4096
- Be in the same catalog
- Be on the same volume
- Be in the same RACF group

Do You Have Questions, Problems, or Suggestions?

Softcopy Reader and SoftCopy Librarian

To report problems with using the Softcopy Reader or SoftCopy Librarian, send an e-mail to bookmgr@us.ibm.com to directly contact BookManager Product Support.

Other Topics

To report problems with installing or using the library, or accessing books, see the sections that follow.

In the U.S.A.

Do the following:

- 1** Call the IBM Support Center, 1+800+IBM-SERV. You will first connect with a voice menu. Press **0** at any time to connect with a customer service representative.
- 2** Tell the customer rep your customer number (access code). If you do not have a customer number, use **BookMgr** as your generic customer number or access key.
- 3** The customer rep will ask you if this is a new or an existing problem. Answer:
 - **New** if this is the first time you have called about this problem.
 - **Existing** if you have a problem management record (PMR) number already assigned to the problem.

Note: Make sure you have your PMR number available.
- 4** The customer rep will ask you what software product operating system you are using. Answer "My product ID is 5648-032-00 and the queue is SCKIT,118."
- 5** Give the customer rep your name, address, phone number, and a description of the problem. The customer rep will generate your PMR and queue it to SCKIT.
- 6** Hang up and wait for a call back.

In Other Countries

For detailed instructions on how to contact IBM, and for the contact telephone numbers in worldwide locations, go to the Software Support Handbook page on the World Wide Web at:

<http://techsupport.services.ibm.com/guides/handbook.html>

In All Locations

For problems, questions, or suggestions about any of the books, contact IBM:

- **Mail** the Readers' Comments form from the back of this booklet or one that you printed from an online book, or address comments to:
 - IBM Corporation
 - Department 55JA, Mail Station P384
 - 2455 South Road
 - Poughkeepsie, NY 12601-5400
 - U.S.A.
- **FAX** comments to:
 - In the U.S. and Canada:** 1+845+432-9405

In other countries: IAC+1+845+432-9405

- **Send** comments electronically to:

Internet: mhvrcfs@us.ibm.com

World Wide Web: <http://www.ibm.com/servers/eserver/zseries/softcopy/feedback.htm>

IBMLink: IBMUSM10(MHVRCFS)

If you do not use the Readers' Comments form, please mention the order number of this collection (SK3T-4269-13) or the book you are using in your comments. If you would like a reply, include your name and address, your company's name, and your phone or FAX number.

IBM may use or distribute whatever information you supply in any way it believes appropriate without incurring any obligation to you.

Communicating Your Comments to IBM

eServer zSeries Online Library
z/OS V1R6 Collection
September 2004
Publication No. GC23-3433-13

For problems installing or using the library, or accessing books, see *Do You Have Questions, Problems, or Suggestions?*. For problems, questions, or suggestions about any of the books, contact IBM.

If you especially like or dislike anything about this book, please use one of the methods listed below to send your comments to IBM. Whichever method you choose, make sure you send your name, address, and telephone number if you would like a reply.

Feel free to comment on specific errors or omissions, accuracy, organization, subject matter, or completeness of this book. However, the comments you send should pertain to only the information in this manual and the way in which the information is presented. To request additional publications, or to ask questions or make comments about the functions of IBM products or systems, you should talk to your IBM representative or to your IBM authorized remarketer.

When you send comments to IBM, you grant IBM a nonexclusive right to use or distribute your comments in any way it believes appropriate without incurring any obligation to you.

If you are mailing an RCF from a country other than the United States, you can give the RCF to the local IBM branch office or IBM representative for postage-paid mailing.

- If you prefer to send comments by mail, use the RCF at the back of this book.
- If you prefer to send comments by FAX, use this number:
 - FAX: (International Access Code)+1+845+432-9405
- If you prefer to send comments electronically, use this network ID:
 - IBMLink: (United States customers only): IBMUSM10(MHVRCFS)
 - Internet e-mail: mhvrcfs@us.ibm.com
 - World Wide Web: <http://www.ibm.com/servers/eserver/zseries/softcopy/feedback.htm>

Make sure to include the following in your note:

- Title and publication number of this book
- Page number or topic to which your comment applies

Optionally, if you include your telephone number, we will be able to respond to your comments by phone.
