
Where to Find Information on System APIs

Use the AS/400 Information Center to find information on the following system APIs topics:

- List of APIs
- Language selection considerations
- Data types and parameter coding
- User space format for list APIs
- API error reporting
- Open list information structure
- Path name structure
- POSIX thread API concepts

Use the Information Center as the starting point for all of your AS/400 technical information needs. It provides fast, easy access to information through the use of a Web browser.

Accessing the Internet version of the AS/400 Information Center

To access this information on the Internet, select from the following:

- To read the topic in English, see OS/400 APIs
- To read the topic in another language, go to <http://www.as400.ibm.com/infocenter>. Select your language of choice and press GO!

On the first page of the Information Center, look for OS/400 APIs under Programming -> CL and APIs.

Accessing the CD-ROM version of the AS/400 Information Center

To access this information on the AS/400 Information Center CD-ROM, look for OS/400 APIs under Programming -> OS/400 APIs on the first page of the Information Center.

The AS/400 Information Center CD-ROM arrives with your system software. The order number for the English version is SK3T-2027.
